Daniel Alejandro Perez Victoria

PROFESSIONAL SUMMARY

Seasoned software developer with over 7 years of professional experience. He is highly skilled in a wide range of programming languages and web technologies, with nine years of expertise in React and Node.js.

SKILLS

- **Programming Languages**
  JavaScript, TypeScript, SQL, PHP

- **Frontend Technologies**
  React, Next.js, Vue.js, jQuery, AngularJS, Tailwind CSS, Material UI, Component UI

- **Backend Technologies**
  NodeJS, ExpressJS, Laravel,

- **Database Management**
  MySQL, PostgreSQL, MongoDB, Prisma.js

- **Platforms**
  Docker, Google App Engine, MacOS, Linux, Google Cloud Platform (GCP), Kubernetes, Oracle, Apache Kafka, AWS Lambda, Amazon Web Services (AWS), Vercel, Azure,

WORK HISTORY

Senior Front-end Developer | Bilt Technologies Inc

04/2022 – 09/2024

- Worked collaboratively in a dynamic and fast-paced team environment, consistently delivering high-quality results within tight deadlines while adapting quickly to evolving project requirements.
- Worked with a robust monorepo strategy, crafting numerous reusable components that seamlessly maintained a uniform and cohesive UI/UX design throughout the entire web application.
- Effectively utilized Sentry and Linear for comprehensive bug tracking, contributing to a consistently low bug count and enhancing overall software quality by swiftly identifying, addressing, and proactively resolving issues.
- Collaborated closely with the Design and Product teams to maintain a well-organized and structured feature set, ensuring seamless communication and alignment between development and design objectives.

Senior Full-stack Developer | Fieldcraft, Inc

03/2019 - 03/2022

- Worked on 10 pages and made them fully responsive on mobile—previously, they were desktop-only.
- Attended a brainstorming meeting in order to improve the user flow for some pages, achieving the best usability for each user flow.
- Created a brand-new mobile menu that significantly improved user flow—previously, user navigation was much more difficult.

Front-end Developer | Rnwbl

11/2015 - 08/2018

- Created an intuitive and efficient user interface for the web component aimed at administrators. Through careful analysis of user workflows and preferences, I developed a sleek and responsive interface. It was one of my most notable accomplishments.
- Created an intuitive and efficient user interface for the web component aimed at administrators. Through careful analysis of user workflows and preferences, I developed a sleek and responsive interface. It was one of my most notable accomplishments.
- Improved time loading speed, refactoring some queries only to fetch needed data, minimized rendering overhead, and reduced initial page load times using the code split technique.
- Consistently worked closely with the CTO to craft the optimal user experience and gain a deeper understanding of the product's requirements.
- Worked in a fast-paced work environment, efficiently utilizing a Kanban board to track bugs and features. Demonstrated an unwavering commitment to meeting deadlines, consistently delivering tasks promptly, and ensuring seamless project execution.
- Contributed to elevated code quality by serving as a code reviewer, ensuring robust and efficient solutions for the company.

EDUCATION

Universidad de los Andes   *2014-2017*
Diploma in Software Development

FIA-Online   *2021-2022*
Bachelor's degree : Software Engineering

LANGUAGE

- **English** : Fluent
- **Spanish**: Native or Bilingual
